## EDUCATION

---

### Rochester Institute of Technology

Rochester, NY

Major: Bachelor of Science, **Software Engineering**

Expected Graduation: December 2019

Minor: Management Information Systems, German Modern Language

**Scholarships:** Presidential Academic Scholarship, Rochester Institute of Technology, Awarded Certificate of Excellence for A1 German Language Course at the Goethe Institut, Lagos.

**Awards:** Ericsson Innovation Awards 2018 Finalist

**TECHNICAL SKILLS:** *Python, Java, JavaScript (Node.js, Angular.js, React, VueJS, Angular5), C#, ASP.NET, Ruby, Django, HTML5, Version Control (GIT, SVN), MongoDB, SQLite, Docker.*

### PROJECTS:

**Stör:** Peer to peer physical storage web platform that allows people with extra space closet to monetize that space by providing it to people in need of a storage solution. A beta version is currently available and can be seen at <http://storapp.io/>. I developed this using Node.js and MongoDB on the backend and Vue.js, HTML and CSS on the front end.

**Releaf Ikeora Investor Platform:** Developed platform to allow verified users login and have access to Database of investable companies. Releaf is a Y-Combinator backed startup which is focused on bridging the gap between international investors and African Companies. Website: <https://releaf.ng/>.

**Alfred:** Alfred is an AI-powered personal information concierge. Alfred can automatically flag suspect information, recommend content outside of your echo chamber, and more. He will sit in your browser and help you sift with the noise and engage with diverse, high-quality content. Alfred was a submission to the **Ericsson Innovation Awards 2018** and came in 2nd place at the Grand Final in Stockholm. Alfred was developed as a twitter bot and as a chrome extension. It was developed in **Node.js** and the recommendation engine which powered it was developed in **Python**.
